Cracking observations	Yes	No	If yes, location, indicate on map and comment	Photo ref.
Is there evidence of new cracking on site?				
Is there any evidence of extension of existing cracks?				
Are there any cracks on the upper plateaux <1m behind the slope crests?			This could imply block detachment processes are underway.	
Are there any cracks on the upper plateaux >1m behind the slope crests?			IF YES, URGENT ACTION REQUIRED, SEEK EXPERT ADVICE IMMEDIATELY.	
Is there any water ponding in existing cracks?				
Other observations of cracking?				

Surface activity observations	Yes	No	If yes, location, indicate on map and comment	Photo ref.
Are there any notable areas of recent erosion?				
Are there areas of overhanging bank?				

Scalby Ness Field Record Sheet

Is there evidence of any large scale bank collapses?				
--	--	--	--	--

Surface water observations	Yes	No	If yes, location, indicate on map and comment	Photo ref.
Is there evidence of water ponding on the surface?				
Are there any areas where seepages are occurring at the ground surface?				
Are there any areas of wet or damp ground?				
Other surface water observations?				

Drainage observations	Yes	No	If yes, location, indicate on map and comment	Photo ref.
Are there any locations of water discharge from pipes onto slopes?				
Is there any evidence of blocked drainage or uncontrolled discharge?				
Other?				

Scalby Beck observations	Yes	No	If yes, location, indicate on map and comment	Photo ref.
Are there any notable areas of recent bank erosion?				
Are there areas of overhanging bank?				
Is there evidence of any large scale bank collapses?				
Other?
