

Filey Flood Alleviation Scheme

PAR Appendix M – Record of Consultation

- 1. List of consultees**
- 2. Table of project consultation**
- 3. Example of Newsletters distributed to residents**
- 4. Collated feedback from public exhibition held 23rd June 2015**

1. LIST OF CONSULTEES

- Natural England;
- Environment Agency;
- Scarborough Borough Council;
- North Yorkshire County Council;
- Yorkshire Water;
- Filey Bird Observatory and Group (FBOG);
- Filet Town Council;
- County archaeologist;
- Local public, via local press and the project website (<http://fileyfloodalleviationscheme.wordpress.com>)

2. SUMMARY OF CONSULTATION

Date	Who	Event
Filey Ravines Flood Alleviation Strategy Study (2011)		
06/11/2009	Public	Public Exhibition, Evron Centre Filey
Filey Flood Alleviation Scheme Design (2013)		
	Public	Press releases
	County archaeologist	
15/10/2014	Jack Whitehead, Filey Bird Observatory Group (FBOG)	Site visit to discuss impact on dams
05/05/2015	Landowners	Presentation
23/06/2015	Public	Public Exhibition, Evron Centre, Filey
15/10/15	Planning Committee Members	Presentation to the planning committee
Additional Consultation		
Quarterly meetings	Filey Flood Working Group – Environment Agency, Yorkshire Water, Natural England, Scarborough Borough Council, North Yorkshire County Council, Filey Town Council	Filey Flood Working Group – set up to provide a multi-agency approach
Various	Public	Newsletters distributed to residents by the Filey Flood Working Group

4. EXAMPLE OF NEWSLETTER ISSUED TO RESIDENTS

The plan, on the reverse side of this newsletter, shows the basic concept of the revised proposals for the Flood Alleviation Scheme.

The basic idea is to allow the current agricultural drainage system to be reinforced by the creation of a series of earthwork channels (swales) higher up the slopes and further away from the town.

The run off water from the surrounding agricultural land will be intercepted before it overwhelms the drainage system in the town. The water will be temporarily contained in run off holding areas. The holding areas are designed to hold the water for sufficient time to allow the towns drainage system to empty.

Some of the water will then be discharged into the drainage system in a more controlled manner. The remainder of the intercepted water will be discharged down Arndale to the sea at a controlled rate of flow.

The construction of the scheme will not require large amounts of concrete as the vast majority of the work involves moving large amounts of earth. The soil removed to create the new channels will be used to increase the capacity of the existing land drainage system and the new embankments.

The detailed design is due to be completed by the summer of 2015 with a planning application submitted later in the year. It is anticipated that construction could take about 12 months to complete.

**An Exhibition of the proposals will take place
from 2.00 pm to 7.00pm
on Tuesday 23 June in the Concert Hall.**

The latest plans showing details of the scheme will be on display with people on hand to explain and answer questions.

FURTHER PROGRESS ~ Update May 2015

**Significant Milestone for the
Filey Flood Alleviation Scheme**

The work of the Filey Flood Working Group (FFWG), in conjunction with Scarborough Borough Council, is moving ever closer to a successful conclusion.

The latest major step forward has been the completion of the revised draft design of the scheme together with a revaluation of the estimated costs.

As well as reinforcing the existing drainage of the agricultural land, the draft design adds an additional line of alleviation measures including the creation of temporary run off holding areas.

The next stage, the detailed design work of the Filey Flood Alleviation Scheme will be followed by the tendering process for the construction work.

Other necessary work before any construction can take place includes the submission of a Planning Application.

The start of the construction is likely to be early in 2017 mainly due to the scope and quantity of the reports still to be prepared and approved by the organisations expected to provide the necessary funding.

These steps are leading towards the culmination of over 12 years of work by the Filey Flood Working Group, the multi agency group formed by the Town Council following the major flood event in 2002.

The work of the group has already seen Yorkshire Water invest £3.4 million to increase the capacity of their system in the area around the lower end of Muston Road.

Similarly our work with the council, associated with the development of Mill Meadows, secured the requirement for the developers to include a new surface water system far in excess of prevailing industry requirements.

5. PUBLIC EXHIBITION 23RD JUNE 2015 - COLLATED FEEDBACK FORMS

Attendance: 63 people

Name	Chris Elley	Kath Wilkie	Helen Burgin	Mr C.J. Brown	EJ Burton
Contact Details	07966751340	Room 23, Evron Centre	01723512486	jujufzevo@aol.co.uk	27 Wooldale Drive
Do you understand the need for the scheme?	Yes	Yes	Yes	Yes	Yes
	-	-	-	The sooner something is done the better	-
What are your general views on the proposed scheme?	Very Supportive	Very Supportive	Supportive	Supportive	Very Supportive
	-	-	-	Basically good if it solves the problem long term	Very good, can't come soon enough
Do you have any concerns about these proposals?	No	No	Height of embankment adjacent to Cherry tree Drive – have been reassured	-	None
Has this exhibition been helpful in terms of giving you information about the scheme?	Very Helpful	A little helpful	Very helpful	Very helpful	Very helpful
	-	-	-	-	-
Any further comments?	-	Have requested copy for community office	-	I was shown maps showing the flood models (size A3) for Filey and would like to know if I could obtain copies of these maps for my own information. Please let me know via my email address.	-

Name	Mr J Collins	Mr & Mrs Magger	Mr & Mrs Brown	Robert Agus	Dr Peter Rickard
Contact Details	01723518215	8 Barden Place / 01723514989	07599254154	81 Wooldale Drive / Robert@whiteaguspartnership.co.uk	01751475253
Do you understand the need for the scheme?	Yes	Yes	Yes	Yes	Yes
	Yes I think it is of paramount importance	2 flash floods within a few years – it must not happen again	-	-	-
What are your general views on the proposed scheme?	Very Supportive	Very supportive	Supportive	-	Very Supportive
	It is a good project, anything to decrease the possibility of flooding is most welcome. It looks like it has been looked at in some detail in order to get a good result.	As above	Provided the site is left tidy with topsoil and seeded with grass it will be fine	Is it possible to view topo survey?	Essential to keep surface water surges out of the combined drainage system
Do you have any concerns about these proposals?	No concerns, except possibility of delays to this due to cuts	-	No	Concerned that embankment (0.5m high) is to be created along the northern side of Wooldale Drive that may divert surface run-off towards my property. Also the field falls away from my property to the north. Therefore I do not understand the need for an embankment at this location.	The maintenance costs shown on the exhibition charts seem wholly inadequate to a layman, unless you intend for landowners to maintain the basins, culverts, and trenches.
Has this exhibition been helpful in terms of giving you information about the scheme?	Very helpful	Very helpful	Very helpful	-	Very helpful
	Staff were most helpful	-	It answered our questions of how far away the embankment will be and how high	-	-
Any further comments?	-	-	We wonder if the machinery access to the site will disrupt the surrounding roads or will it be kept reasonable clean	-	I was please to see that the new housing development at Mill Meadows must retain its surface water on site. I would be interested in learning more about the design and operation of this scheme.

Potential Community Contributions Feedback – Public Exhibition 23rd June 2015

Please indicate your view of the principle of a community contribution to the costs of the Filey Flood Alleviation Scheme	Very Supportive	Supportive	Undecided	Against	Strongly Against
	1	6	-	-	1
Please indicate which method of contribution you think would be the more acceptable if it was found to be necessary	Small rise in Council Tax	One off payment	Voluntary contributions	Community fundraising project	
	2	5	-	-	
Please indicate the amount of contribution per household which you think would be reasonable	No contribution	£0 to £50	£50 to £100	£100 to £500	£500 to £1000
	-	1	5	1	-
